<p>1. A review of the CARAVEL files held by the Station revealed that virtually all of the basic operational and administrative data relating to this operation is missing. The files presently available in the Station date back to about 1960 with a few references back to 1958. Since the operation dates back at least to the immediate post World War II years, we assume that most of the essential administrative and operational documents were shipped to Headquarters during one of the German Station's periodic file reduction exercises.</p> <p>2. We would appreciate receiving a brief description of the pre-1960 history of this case which would include such basic data as when the agent was recruited, the date of his Operational Approval, together with any amendments, the terms of his MOA or similar agreement, any commitments re evacuation, a list of the case officers with whom he has had contact and any other pertinent information which Headquarters feels would be essential.</p>
